PROFESSIONAL SUMMARY

Performance-driven **Software Development Engineer (SDE)** and **M.Tech Computer Science & Engineering student at NSUT** with a strong GATE score (94.19 percentile) and deep expertise in DSA, MERN stack web architectures, and real-time systems. Demonstrated history of designing scalable MERN applications, implementing secure REST APIs, and writing clean, maintainable code. Passionate about solving complex algorithmic challenges and contributing to high-impact software systems.

EDUCATION

Netaji Subhas University of Technology (NSUT) <i>M.Tech in Computer Science and Engineering – CGPA: 7.89</i>	Delhi, India 2025 – 2027
Maharishi Dayanand University (MDU) <i>B.Tech in Computer Science and Engineering – 72.5%</i>	Delhi, India 2021 – 2025

EXPERIENCE

Ornate TechnoServices Pvt. Ltd. <i>Software Engineer Intern</i>	Noida, UP May 2024 – Jan 2025
- Engineered and maintained scalable RESTful APIs and server-side business logic using Node.js and Express.js, ensuring secure and high-throughput data processing. - Designed dynamic, responsive UI components using React.js, integrating REST APIs with efficient state-management to enhance user interaction. - Managed and optimized MongoDB databases, database queries, and indexing to improve data retrieval speeds and resource efficiency.	

PROJECTS

YatraMitra <i>Next.js, React, Node.js, MongoDB, Socket.io</i> Client CRM Code	2026
- Architected a MERN bus booking platform featuring a Next.js SSR customer portal, a React CRM dashboard for operators, and a secure backend with JWT-based role-based access control (RBAC). - Integrated Socket.io for real-time seat status mapping (preventing double bookings) and implemented gender-adjacent seat locking rules for traveler safety. - Integrated Razorpay API for payment lifecycles and configured automated ticket/route updates via Nodemailer and Node-Cron with optimized MongoDB collections.	
MealCraft <i>React, Node.js, Express, MongoDB, Stripe, GSAP</i> Live Code	2026
- Developed an AI weekly meal planner that computes caloric/macronutrient goals using user metrics, styled using custom GSAP transitions and optimized with LocalStorage caching. - Configured secure double-layered authentication (JWT and Google OAuth 2.0) with non-blocking 6-digit OTP verification via Nodemailer SMTP and Brevo HTTP APIs. - Designed optimized MongoDB collections to track order status lifecycles (Pending to Delivered progression) and integrated Stripe SDK for secure checkout.	

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript (ES6+)
Frontend Technologies: React.js, Typescript, Next.js, HTML5, CSS3, Bootstrap, Tailwind, GSAP, Framer Motion
Backend Technologies: Node.js, Express.js, RESTful APIs, JWT, OAuth 2.0
Databases & ORMs: MongoDB, MySQL
Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPS), DBMS, Operating Systems
Developer Tools: VS Code, Git, GitHub, Render, Netlify, Vercel

CERTIFICATIONS

Fundamentals of Deep Learning <i>NVIDIA</i> Certificate Link	November 2025
Certification ID: A2U7dZpKSgqbqhXR6YES6w	

ACHIEVEMENTS

GATE CSE Qualified GATE examination with a 94.19 percentile	2025
---	------
